

Taking bearings at sea

- Place your protractor in the circle on the map so that 000° lines up with the North direction. Find the bearing of each place on the map from the ship. Record like this:

Place	Bearing
Millport	000°

- On what bearing should the ship sail to pick up survivors from
 - a sailing dinghy at point D,
 - a fishing boat at point F?

- On what bearing is the ship sailing on the map?

- Write down suitable bearings for the ship to pass
 - between Pladda Island and Ailsa Craig,
 - between Arran and Bute.
