

## Roads at the airport

- 1 Use a protractor to measure angles A and B.
- 2 (a) Estimate the size of angles C to K.  
(b) Check your estimates using a protractor.

- 3 Draw angles of  
(a)  $60^\circ$  (b)  $90^\circ$  (c)  $120^\circ$   
(d)  $150^\circ$  (e)  $180^\circ$  (f)  $210^\circ$

Ask your teacher what to do next.
